### Our LeaderMMS Technology

Using our innovative system to record important medical data, the office can almost become paperless. Our customized medical management system increases employee productivity, minimizes human error and lowers your overall office costs.

### One size doesn't fit all – Customized Medical Management System (MMS)

Every organization has their unique needs for an independent operating model and off-the-shelf software simply cannot suit most offices. We know one size doesn't fit all, which is why we want to develop a customized medical management system that adapts to your clinical workflow.

### FREE Consultation with our IT specialist

While most expert consultations can easily cost over \$1000, we do it for free. In our one-on-one chat, we'll discuss your IT needs, answer questions and clear any doubts or misconceptions you may have about your goals and our product. We'll also let you know how our customized system can make your office more efficient and effective.

### FREE Employee training

After we develop your customized medical management system, we will be on-hand and on-call to make sure your office runs like a well-oiled machine. Furthermore, we'll instruct as many staff members who need the tools necessary to operate your custom medical management system.

### Support, Support and MORE IT Support

We want to make sure your custom medical management system is performing to your highest standards at all times. In fact, our IT support is one of the main reasons why our customers prefer LeaderMMS over competitors. If there's ever a problem, our accessible and responsive support team will personally address each concern paramount to the daily workflow and LeaderMMS. We're just a phone call away...

### Pricing

By incorporating our custom built LeaderMMS into your office, you'll only pay for the features you need in a medical management system. In most cases, the **price ranges from \$300-\$1500 monthly**. There are **no setup fees** or any other hidden costs.

Based on current market research, a ready-made medical management system costs roughly \$900 monthly. Our research tells us two important things with those systems:

1. You'll be paying extra money for features that you don't need
2. You probably won't have the features that you do need

With LeaderMMS, your office gets what it needs at one of the most competitive price points in the industry.

# Testimony

Here's what a leading medical professional has to say:

"...the custom built medical management system saves us money since we no longer buy charts, stickers, printing, etc. Not to mention the fact that it makes our office more efficient. There are no more lost charts, no time wasted filing charts at the end of the day, and so on. With my laptop or home computer, I can access the custom medical management system remotely, and I can sign the charts from almost anywhere."

*John Bills MD, President  
Cordova Medical Clinic*
